

DO CONG MINH

FRONTEND DEVELOPER INTERN

INFORMATION

- Gender: Male
- Date of Birth: October 29, 2004
- Phone: 0372986808
- mdang2186@gmail.com
- Address: Hai Ba Trung, Hanoi

LINKS

- github.com/Mdang2186
- linkedin.com/in/mdang2186
- portfolio: mdang2186.vercel.app

EDUCATION

- University of Economics - Technology for Industries 2022 - 2026
- Software Engineering
 - GPA: 3.38/4.0

CERTIFICATIONS

- MOS Excel: 860 2023
- TOEIC: 550 2026 (expected)

SKILLS

- Languages:** JavaScript, TypeScript, C#/.NET, Java
- Frontend:** ReactJS, Next.js, html/css, JavaScript, TypeScript.
- Backend:** NestJS, ASP.NET Core, Node.js, Java Servlet.
- Database:** SQL Server, MySQL, Prisma ORM.
- Tools:** Docker, Git/GitHub, Postman, Figma, VS Code

CAREER OBJECTIVE

As a Software Engineer, I aim to become a professional **Frontend Developer**, starting from an internship position to accumulate practical experience in user interface development. With a technical background and modern design thinking, I desire to participate in projects where I can learn, contribute, and create intuitive, user-friendly web experiences.

NOTABLE PROJECTS

Student Management System (Microservices)

02 - 05/2026

— Graduation Thesis (2-member team) —

Role: Team Lead & Fullstack

Link: github.com/Mdang2186/MicroServices_QLSV

An education management system based on Microservices architecture, separating individual services to optimize performance and maintainability.

Key Contributions:

- Designed and developed the entire Frontend using Next.js 14 and Tailwind CSS, delivering a modern, responsive UI/UX experience.
- Handled routing and authorization for 4 user groups based on JWT.
- Managed State and integrated APIs for workflows: Course registration, schedule display, and grade entry/lookup.
- Used Socket.io to process real-time QR Code attendance tracking.
- Acted as Team Lead, supporting the building of services with NestJS, and configuring Prisma ORM with SQL Server. Configured Docker to package and run all services synchronously.

Technologies :

- Next.js, NestJS (Node.js), Prisma ORM, SQL Server, Microservices.
- Git/Github, Antigravity, Docker.

MotorShop - Motorcycle Sales Website

10 - 12/2025

— Course Project (2-member team) —

Role: Team Lead & Frontend/UI-UX

Link: github.com/Mdang2186/MotorShop

A motorcycle sales website allowing customers to view products, use AI for vehicle selection, and place orders, alongside an admin dashboard for data management.

Key Contributions:

- Developed the entire Frontend interface using HTML, CSS, JavaScript, and Bootstrap through ASP.NET's Razor Views mechanism.
- Optimized Responsive Web Design, ensuring the store and cart interfaces display smoothly on Mobile.
- Used AJAX & jQuery to handle dynamic features: Filtering motorcycles by criteria, real-time cart updates.
- Integrated UI for an AI Chatbot consulting feature and designed a statistical Dashboard for administrators.

Technologies:

- ASP.NET Core MVC, C#, SQL Server, Visual Studio, Git/GitHub.

SOFT SKILLS

- Effective teamwork
- Clear communication
- Time management
- Team leadership, problem-solving
- Maximizing resource utilization

HOBBIES

- Learning design trends
- Market research
- Reading tech news

● LUXE INTERIORS - Furniture Sales Website

10 - 12/2025

— Course Project (4-member team) —

Role: Team Lead & Frontend/UI-UX

Link: github.com/Mdang2186/LUXE_INTERIORS

An e-commerce website selling furniture with a complete shopping flow (view products -> cart -> order) and an admin area to manage products & orders.

Key Contributions:

- Planned the project, designed the interface and database schema, and coordinated work for the 4-member team via Git/GitHub.
- Developed the entire store interface and Admin Dashboard using Bootstrap and JavaScript. Optimized UI/UX for operations from viewing products to successful ordering.
- Coordinated closely with Backend members. Directly used JSP/JSTL to render dynamic data from Java Servlet to the HTML interface accurately and securely.
- Responsible for reviewing other members' interface code and testing cross-browser display errors.

Technologies:

- Frontend: JSP/JSTL, HTML, CSS, JavaScript, Bootstrap.
- Backend & Database: Java Servlet, SQL Server.
- Tools: NetBeans, Apache Tomcat, Git/GitHub.

● Recruitment Profile Management Website

06 - 07/2025

— Course Project (3-member team) —

Role: Team Lead & Frontend/UI-UX

Link: github.com/Mdang2186/QuanLyHSTD

An internal web system managing recruitment profiles for businesses, supporting the management of vacancies, candidates, employees, interview schedules, and interview rooms on a single platform.

Key Contributions:

- Built an intuitive Dashboard interface. Optimized layout to display data tables for easy viewing and interaction.
- Optimized user experience on Data Tables and multi-step data entry forms.
- Used AJAX / jQuery to handle asynchronous tasks such as updating candidate status (Pass -> Fail -> Pending), and filtering and searching profiles in real-time without reloading the page.
- Coordinated with the Razor View engine (ASP.NET) to render interfaces based on user roles (Admin, HR, Interviewer), ensuring each role only sees permitted functions.

Technologies :

- Frontend: ASP.NET MVC, HTML, CSS, Bootstrap.
- Backend & Database: C#, SQL Server.
- Tools: Visual Studio, Git/GitHub.
